Joshua Ravello-Wharton

ABOUT ME

As an aspiring developer, I am driven to learn and grow within the industry. I hold a Diploma in Computing and a Higher National Diploma in Computing Systems Development and have honed my technical skills through personal projects and coursework. While my professional experience may not be directly related to the field, working in customer service roles at a phone store and warehouse has taught me the value of communication and collaboration.

Please feel free to view my projects on GitHub and connect with me on LinkedIn to learn more about my experience and skills.
